Public Lecture (60 min)

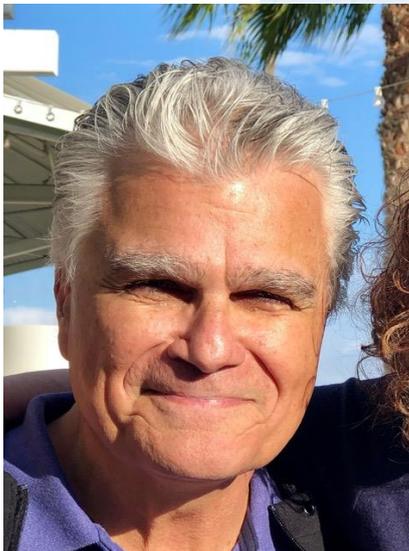

Prof Louis Cozolino

Thursday 21 May 2020 at 18:15 pm

**Melbourne Brain Centre (Kenneth Myer Building)
144/30 Royal Parade, Parkville VIC 3052, Australia**

**The Tribal Classroom:
Optimising Learning through the
Social Neuroscience of Attachment**

Early bird (to 31/3/2020) \$65 Admission General \$75 Students \$50

Over the last fifty years, the faith that past generations may have placed in education as a path to economic opportunity has been eroding. Many no longer view public education as a worthwhile investment, making it increasingly vulnerable to declines in resources and quality. This shift is reflected in rates of student dropout, teacher burnout, and a flight to private and home schooling. In some quarters, the perception of public schools has shifted from a solution to social and economic problems, to a problem in and of itself.

In this talk, Louis Cozolino will address this challenge and more, through the lens of human relationships. The goal of this workshop is to teach participants how an understanding of brain evolution, social neuroscience, and group behavior can inform, impact, and change our approach to education in powerful ways. By placing healthy and secure attachment at the center of learning, he argues, we can turbocharge plasticity, enhance learning, and improve schools.

ABOUT PROF LOUIS COZOLINO

Prof Cozolino has diverse clinical and research interests and holds degrees in philosophy, theology, and clinical psychology. His interests are in the areas of the synthesis of neuroscience with psychotherapy, education, management, and leadership. He is the author of seven books *The Neuroscience of Psychotherapy*, *The Social Neuroscience of Education*, *The Neuroscience of Human Relationships*, *The Healthy Aging Brain*, *Attachment-Based Teaching*, *The Making of a Therapist*, and *Why Therapy Works*. He has also authored and co-authored articles and book chapters on child abuse, schizophrenia, education, language and cognition. Prof Cozolino lectures around the world on brain development, evolution, and psychotherapy and maintains a clinical and consulting practice in Los Angeles.

Prof Cozolino holds degrees in philosophy, theology, and clinical psychology and focuses on the synthesis of neuroscience psychotherapy, education, management, and leadership. Prof Cozolino lectures around the world on brain development, evolution, and psychotherapy and maintains a clinical and consulting practice in Los Angeles.
